- Gasket and hardware replacement
- Secondary containment lining
- Maintenance painting

Advantages

- 50 years experience in facilities maintenance
- OSHA-compliant safety program
- Corrosion surveys and analysis
- Turnkey project management
- Competitive pricing

Facilities Maintenance Coatings

Through our Facilities Maintenance Coatings program, Goodwest Linings & Coatings provides engineered solutions to difficult corrosion control maintenance issues. Our experience includes maintenance coatings of chemical plants, nuclear and conventional power plants, metal processing plants, mining operations, and many other types of facilities. Goodwest employs knowledgeable project managers who specialize in innovative coating solutions. Our experienced craftsmen understand that safety, quality and service are key factors in providing a successful facilities maintenance coating program.

Safety

- OSHA-compliant safety program
- Experience in stringent safety environments
- Expertise in confined space safety
- Thorough job safety analysis
- Complete safety equipment inventory

Quality

- SSPC-QP3 certified
- NACE Level III inspector on staff
- Expert applicators of a wide range of protective materials
- Meets demanding specifications and schedules
- Specialized inspection equipment

Mining project requiring metal resurfacing and rubber relining of 25' dia process tank.

Food and Beverage project requiring existing coating removal and recoat with 100% solids novolac epoxy system.

About Goodwest Linings and Coatings

Goodwest has installed dependable protective lining and coating systems since 1961. Water, oil, power, transportation, and other key infrastructure providers rely on Goodwest to ensure critical equipment stays in service as long as possible. Goodwest specializes in applying materials resistant to the most aggressive chemical, abrasion, and high temperature environments. Our facility is located in Rancho Cucamonga, 30 miles east of Los Angeles. We perform field work throughout the western United States.

SINCE 1961
