

Chemical Transportation

In the transportation industry, time is money. At Goodwest Linings & Coatings we have been providing quality lining installations for more than 25 years to get tank trailers repaired and back in service as soon as possible.

We support industries transporting a variety of corrosive chemicals including bleach and acids, operating in the most aggressive chemical, abrasion, and high temperature environments. Goodwest has extensive experience in applying the widest variety of protective linings, giving our customers the assurance that optimum materials are chosen and properly installed.

Advantages

- 25 years experience in lining application for chemical transportation
- Offer a wide array of both rubber and spray-on linings
- Technical expertise on recommendations of lining materials
- NACE Level III inspector on staff
- Wide range of protective materials
- Lining inspections and repair estimates within 24 hours

Industries

Services

- DOT lining inspections and certifications
- Rapid turnaround for inspection reports with repair estimates
- Mobile field crew
- Repairs and complete relines
- Lining removal and steel decontamination
- Wide variety of protective materials offered

Goodwest has serviced over 2,000 tank trailers and railcars, earning the trust of companies for 25 years.

Chemical transportation is a hazardous industry. The liability is high, especially when dealing with very aggressive products. A lining failure can be catastrophic to a company's reputation and success. Our customers depend on our ability to deliver the toughest lining applications for most severe service environments. We have the technical expertise to provide recommendations and solutions for even the most complex requirements. As a full service provider, we carefully consider all material options in designing the best lining system for your application.

Quality

- NACE Level III inspector on staff
- SSPC-QP3 certified
- Specialized inspection equipment
- Wide range of protective materials
- Lining solutions for critical applications

Safety

- OSHA-compliant safety program
- Experience in stringent safety environments
- Thorough job safety analysis
- Experts in confined space safety
- Complete safety equipment inventory

Goodwest's mobile field service provides inspections and repairs at facilities throughout the western U.S.

About Goodwest Linings and Coatings

Goodwest has installed dependable protective lining and coating systems since 1961. Water, oil, power, transportation, and other key infrastructure providers rely on Goodwest to ensure critical equipment stays in service as long as possible. Goodwest specializes in applying materials resistant to the most aggressive chemical, abrasion, and high temperature environments. Our facility is located in Rancho Cucamonga, 30 miles east of Los Angeles. We perform field work throughout the western United States.
